SKILLS

Red Hat Certified Engineer
Storage Admin (EMC | HPE | Huawei)
Server Infrastructure (Huawei | HPE | Cisco | Dell)
Patch Management (Red Hat Satellite)
Virtualization (VMware | Oracle VM)
Backup Appliance (EMC Networker | Avamar)
Automation Tool (Ansible)

Profile

Analytical and systematic IT service professional with 5+ years of relevant experience in Linux and Windows administration role supporting medium to large mission-critical platforms including physical and virtualized environments. Capable of managing over 500 Linux-Unix servers and 200 VMware based VM's in large-scale consumer enterprises. Exceed expected quality of service on maintenance and deployment of upgrades, enhancements and modifications to production systems within minimum downtime. Demonstrated success in Backup-Storage management to ensure that the system can be quickly recovered after a crash, and supports data integrity by ensuring that the vital information is not lost during an outage.

Know-How & Experiences

- Proficiency working in a mixed Linux / Windows Server infrastructure.
- Well versed in Infrastructure technical issues and knowledge of all aspects of Server Administration.
- Implementation and administration of multi-vendor virtualization technologies like VMware and Oracle VM.
- Excellent know-how in Data Center operations management and network systems.
- Experience with Linux Vulnerability, Security Patch Management using Red Hat Satellite.
- Prior operating experience of heterogeneous environments and integrating standard IT technologies.
- Knowledge in distributed systems and redundancy, HA cluster and performance optimizations.
- Adept in managing and troubleshooting SAN Storage (HP 3par, EMC Unity, EMC VNX, IBM V7K, etc.), Tape Library, for the large-scale computer system in a DC environment. Ability to perform Zone Operation on SAN switch.
- Strong hands-on experience with Rackmount and Blade server hardware (HPE ProLiant, Dell PowerEdge, Cisco UCS, Huawei RH, etc.)
- Expertise in common open source automation, monitoring tools, source control management and technologies (Ansible, Zabbix, GIT, etc.)
- Good knowledge on Backup appliances (EMC Networker, Avamar) to recover Windows, Linux systems in the event of a failure.

Employment History:

Total Year of Experience: 5.10 Year(s)

1. Data & Platform Service Specialist Engineer (April 16, 2017 - Continuing)

Banglalink Digital Communications Ltd. (Mobile Telecom Company)

Department: Business Service Management (BSM)

Key Activities (I have been doing):

Operational Support

- Ensure smooth operation of IT Billing, Mediation, Interconnection, Provisioning, DWH and Revenue Assurance systems.
- MC/Service Guard cluster management in HP-UX with 24*7 support for application running in HA environment.
- Managing, administering and troubleshoot GFS cluster for DWH Systems.
- Configure, monitor and manage infrastructure system using Zabbix and remediate alerts that get raised.
- Repair and recover from hardware or software failures and communicate with impacted teams.
- Troubleshooting, resolving application, RCA of server related issues and complex services with large numbers of interconnecting components.
- Collaborating with IT Security team to implement and regularly test systems security controls.
- Liaison with vendors and suppliers with respect to the support and maintenance contract.
- Write run books for NOC team members to follow. Update services in CMDB, asset records as required.
- Create Incident Reports for major incidents, actively participate in answering / resolving Problem Tickets.
- Resolving issues within prescribed SLA's adhering to incident management procedures.
- Diagnose hardware and software problems, and replace defective components, and make recommendations for any necessary upgrades.

Unix-Linux Server

- Administration and support of complex Linux environments that may include segmented networks, firewalls and SAN attached storage.
- Automate tasks using Shell scripts, Ansible, and other methodologies.
- Implement, integrate and maintain Unix/Linux cluster for high availability.
- Volume management (VG create/remove/extend, online LV extend).
- Configure, manage and troubleshoot PHP, Apache, MySQL and other application dependent servers.

- Perform software installations and upgrades to operating systems and layered software packages.
- Planning, Scheduling and implementing System Patches thru Redhat Satellite.
- User and group administration, auditing the activity and disk quota management.
- Tune kernel parameter to identify OS level performance issues.
- Aiding in the migration towards newer hardware/software.

Storage

- Integrate storage solutions with physical hosts and virtual machines.
- Monitor, analyze, and report on data storage utilization and performance characteristics.
- Provision, maintain and support EMC and other Storage appliances (i.e. 3par, Unity, VNX, DataDomain)
- Manage and administer internal, external storage (create/delete/add LUNs, and integrate host with SAN etc.) with different RAID levels and logical construct of physical disk.
- Manage SAN connectivity and Zoning for Linux/HP-UX/Windows operating systems.
- Adept in SAN Data Migration include EMC Replication Manager, Recover Point.
- Perform capacity management for database and storage systems.

Backup:

- Administer backup and restore activities using EMC Networker.
- Backup Management, Reporting and Recovery.
- Perform daily backup operations, ensuring all required file systems and system data are successfully backed up to the appropriate media, recovery tapes or disks are created, and media is recycled and sent off site as necessary.
- Planning backup disaster recovery and maintain the infrastructure comprises with EMC Networker/Avamar/Data Domain.
- Ensure all critical systems are backed up per schedule and backups are tested regularly.

2. Senior Systems Administrator (November 1, 2016 - April 13, 2017)

IL&FS Technologies Limited (IT & E Governance Infrastructure)

Department: Digital Land Management System, Dhaka

Key Activities:

Windows System Engineering & Provisioning:

- Domain Server installation, configuration and management. Perform regular file archival and purge if needed.
- Managed user profiles, permissions and implement group policy to all Domain hosts. Configure/add new services as necessary.
- Setup new users, decommission departing users, and ensure user permission and file security.
- Rebuild or install new Microsoft Windows Server 2016 and Desktop environments and configure Data Center hardware equipment's, services, etc. in accordance with standard and operational requirements.
- Apply Windows upgrades, patches and hot fixes on a regular basis along with administrative tools and utilities.
- Management, configuration of EMC Storage, Trend Micro Deep Security, Manage Engine Service Desk, and A10 Load Balancer.
- Prepare systems to support GIS infrastructure applications or Asset Management applications.
- Install and configure Finger Attendances and Access Control Devices, IP Camera and Surveillance system.

Operational Support & Maintenance of DLMS Data Center:

- Performed daily system monitoring thru Manage Engine, verified the integrity and availability of all hardware, server resources, systems, key processes, reviewed system and application logs.
- Maintain smooth running of the workstations, laptops, printers, scanner, plotter, and UPS.
- Troubleshoot system and network problems, diagnose hardware or software faults and user requirements in different OS like Windows 7, Windows 10, and different versions of Windows Server.
- Provided Tier II support per request and investigate/troubleshoot issues that raise from different departments.
- Restore service from Hardware/Software failures and replace Data Center equipment parts as required.
- Resolve connectivity problems in the network infrastructure, CCTV, including cabling, hubs, switches, and printer servers.
- Maintained Data Center environmental PAC and monitoring equipment's regularly. Conduct electrical safety checks on computer equipment.

3. Sr. Executive Engineer (July 13, 2014 - October 31, 2016)

Tech Valley Solutions Ltd. (One of the pioneer IT Enable Solution Provider in Bangladesh)

Key Activities:

Linux-Unix Based:

- Responsible for designing, installing, configuring, maintaining and testing RHEL (Or, Linux variants) and HP-UX v11.31 operating systems.
- Configured DNS, SMTP, NTP, PHP, MySQL, Apache, YUM server.
- Implemented 3 nodes RedHat Cluster for different application.
- Diagnose, solve and provide root cause analysis for hardware, software, network, and OS issues.
- HW RAID for Itanium based system (i.e. rx2800, rx2660).

Storage-Based:

- Hands on experience for first time installation and configuration of HP 3PAR StoreServ 7000 storage.
- Resolved HW/SW issues with Disc Based Backup Solution (HP StoreOnce B6200).
- Implementation, configuration, and support for NetApp FAS2552 Storage System using NetApp On Command System Manager.

Virtualization:

- Provided data storage engineering designs and implementation services for multiple data centers.

- Managed VMware infrastructure to provision and decommission of VM's virtual network and cluster using VMware vSphere and vCenter Server.
- Added ESXi hosts into vCenter, configured them with distributed virtual Switches and port groups.
- Performed Snapshots, Clone, Cold Migration and Hot Migration operations.
- Configured Data Center and clusters in vCenter server.

Customer Support:

- Deployed systems with respect to application requirements.
- Provided support to internal and external customers for clarification of technical matters and the resolution of technical issues, improve the end user experience by following best practices adhere to enterprise architecture.
- Assisted in timely and successful delivery of solutions according to stakeholders' needs and objectives.
- Resolved system issues and provide operations support for bridge calls.

Project Based:

- Planned, designed and implementation of HP Data Protector and Oracle VM Server Virtualization for Oracle EBS at Beximco Pharmaceutical.
- Acquaintance with Data Center Relocation of Telecom Company like ROBI, GP, Airtel which end-to-end solutions comprised of HP C7000 Blade Enclosure, HP BL460c Gen-8 Server, HP Tape Autoloader, P2000 MSA Storage, etc.
- Rack Mount and cabling using cable manager with power distribution & networking port for followings.
 - HP DL360p Gen-8 and DL380 Gen-9 Server
 - HP DL380 Gen-7 SFF CTO Server
 - HP P2000 G3 10GbE iSCSI MSA DC SFF Array
 - Kernel-Based Virtual Machine
 - HP TAPE Library (i.e. MSL6480, MSL8096)
 - HP/Dell/Third Party 42U Rack
 - DELL PowerEdge (TM) M520 and M630 Blade Server

4. IT Officer (May 15, 2014 - July 12, 2014)

Northern University Bangladesh

Key Activities:

- Assisted with computer Lab administration in all levels of Hardware and software support as needed.
- Maintained daily basis inspection of the entire IT system equipment's like computers, printers and other peripheral device (i.e. DVR, MC, Router).
- Supported Head office and other branches with all IT related problem like software troubleshooting, hardware malfunction, new OS provision, data recovery etc.

5. IT Support Engineer (April 01, 2013 – December 31, 2013)

Advent Technology

Key Activities:

- Monitored eCommerce website performance and modified the content frequently.
- Provided high level daily hardware support for Desktop Computer and other IT system maintenance.
- Cabling and Crimping network cables and connectors as per requirements.
- Worked with HTML, CSS, JavaScript, WordPress and contributing ideas and design artwork.

CERTIFICATION

RED HAT CERTIFIED SYSTEM ADMINISTRATOR (RHCSA)

Institute : New Horizons (CLC)
Authority : Red Hat
Certificate Number : 140-103-961
Date : June, 2014

RED HAT CERTIFIED ENGINEER (RHCE)

Institute : Linux Pathshala
Authority : Red Hat
Certificate Number : 140-103-961
Date : November, 2014

TRAINING

- Dorado V3 Management, Deployment and Troubleshooting Training by Huawei. (5 Days)
- RH Series Rack Server & E9000 Blade Server deployment & Management Training by Huawei. (4 Days)
- RHCSA in OpenStack (CL110, CL210) v10
- In-house Training on "Docker Container Administration".
- In-house Training on "Banglalink Source Code Repository Server"
- Redhat Satellite Implementation & Operation v6.2.
- Redhat Ansible Operation 2017
- Hadoop Administration (HDP) 2017
- StoreOnce Single Node Service and Support vILT for ServiceOne.
- Solution Designing with Oracle SPARC T7 & M7 Technologies at EZY Infotech.
- HP 3PAR StoreServ 7000 Service and Solution Qualification 2013
- Cisco Certified Network Associate (CCNA) at New Horizon (CLC)

EDUCATION

DEGREE	CONCENTRATION	INSTITUTION	PASSING YEAR
Masters	Information Technology	Jahangirnagar University	(January, 2014 – March, 2017)
Bachelors	Electrical & Electronic Engineering	International Islamic University Chittagong	(March, 2009 – September, 2013)

LANGUAGE PROFICIENCY

Bangla : Proficient
 English : Competent
 Arabic : Conversant

AREA OF INTEREST

IT Service Delivery/Management
 Telecommunication, Information Technology Service
 Project Management
